

## MRI Protocols

- Read over and confirm doctor's order. Review any x-ray/related exam reports Ex: chest x-ray for pulmonary nodule, etc.
- Push prior relevant studies. Any exams that are 2 years old or older will have to be re-loaded into SGRA and pushed with your current study
- Do not assume printed requisition is correct
- Please call SGRA for guidance from radiologists regarding any question you may have about any exam or protocol that may not be listed in this document
- If your facility doesn't have the capability to perform a given exam, let SGRA staff know and a radiologist will advise on alternate sequences/protocol
