

Gastrografin Mixtures (Oral & Rectal)

These mixtures are to be used with Gastrografin **37% Organically Bound Iodine** concentration.

Oral Mixture

25 mL of Gastrografin mixed into 4 cups (1 liter) of water.

To enhance the taste, you may add flavoring to the water such as Crystal Light or Tang, etc. Or you may substitute Gatorade in place of the water.

NOTE: These flavorings may contain ingredients that your patient has a sensitivity to, if this is the case water without flavoring should be used.

Rectal Mixture

120 mL of Gastrografin mixed into 4 cups (1 liter) of water.

This mixture should be placed in an enema bag.
